**HIGH SPEED AND ACCURACY:
LIVE DEMONSTRATIONS OF TECGLASS MACHINES AT GLASSTEC 2016**

**Appointment with Tecglass at the Fenzi stand
for the presentation of three high-tech developments for digital printing on glass
and the new sales support Application.**

The spotlight this year will be focused on Tecglass, the company specialized in machines for digital printing on glass, which joined the Fenzi Group at the beginning of the year. Live printing demonstrations at the Fenzi stand will allow companies specialized in glass decoration to see for themselves the efficacy and accuracy of the elegant technology contained in the Tecglass machines – versatile yet simple and efficient tools for glass decoration, capable of printing all kinds of graphic motifs and photographic images with excellent definition and special color effects.

A practical demonstration of what the most cutting-edge technology in the world of digital printing on glass has to offer.

On display at the show, three high-tech models that exemplify the performance capabilities of the entire range of Tecglass technologies, with an innovative, compact design capable of boosting their usability. The Tecglass machines make it possible to use ceramic inks on sheets of any size (from a minimum of 380x380 mm to a maximum of 3,300x18,000 mm), for indoor or outdoor use, with solutions for all types of sectors and applications. The broad range of sizes of the ink drops ensures speed of handling; production speed and versatility of use with highly accurate printing performance, reaching up to 1440 dpi resolution and the utmost brilliance of color.

Thousands of color formulations are already stored and available for use.

Consistent with the innovative services and customer care policy promoted by the Fenzi Group, at Glasstec, Tecglass will introduce its exclusive App developed as a sales support for its customers. This innovative service, available for smart phones and tablets, makes it possible to view a nearly infinite number of decorative patterns and simulate their effect when printed on glass, for quick and easy demonstration of the final product. Tecglass technology makes it possible to achieve the desired decorative and chromatic effects, in a palette of custom colors and with an immense choice of existing graphic solutions.

Appointment with Tecglass at Glasstec 2016: Fenzi stand – Hall 16 / C 22

Note to the Editor

Fenzi Group – The Fenzi Group was founded in Milan in 1941, where it still has its headquarters, as a producer of mirror backing paints, before branching out to chemical products for the secondary flat glass processing. The Group is now a world leader in the sector with eleven factories in strategic markets across three continents. In both Italy and worldwide, Fenzi is an excellent example of the Italian family-run business tradition that has gradually attained world leadership by delivering high quality standards, constant innovation, maximum safety throughout the production process of mirror backing paints, high-performance IG sealants and decorative glass paints used in the most sophisticated architectural and design projects. Fenzi Group's broad view led to the creation, in 2002, together with Alu-Pro and Rolltech, of the **Glass Alliance**, a large-scale international network that offers customers a wide range of products for high-performance insulating glass.
