GLASSBUILD AMERICA PREVIEW

GlassBuild America: The Glass, Window & Door Expo is expected to host about 340 exhibitors, including more than 120 from outside the United States, at the Georgia World Congress Center in Atlanta, Sept. 16-18. The following pages present an advance look at the glass, metal and related products—many newly released—to be displayed on the show floor. Note: booth numbers are subject to change. Visit glassbuildamerica.com for the most up-to-date information.

ARCHITECTURAL GLASS

Cristacurva

Cristacurva will be showcasing its entire collection of glass offerings for interior and exterior applications. The company provides a variety of glass products tailored to custom architectural specifications, including: building integrated photovoltaic glass; Creanza Interiors decorative glass; Controluz Insulated Blind Units; curved glass; glass stairs and floors; insulating glass units; integrated glass blinds; laminated glass; low-emissivity coated and XIR solar control glass; oversized glass; Royal Doors; Smartech-IG; shower doors and structural glass. Booth #2117. 866/827-6049 | cristacurva.com

Guardian Industries

Guardian Industries' new SunGuard Spandrel HT glass creates a seamless, smooth, matte finish, while concealing interior views from the outside. Spandrel HT glass helps architects and builders achieve the desired exterior appearance to complement the use of SunGuard vision glass. SunGuard Spandrel HT glass is available as a coated stock sheet that is easy to cut and fabricate, company officials report. The company uses a lead-free, proprietary coating that provides superior durability to conventional frits prior to heat treating. SunGuard Spandrel HT glass is available in white, warm gray and black. Booth #805. 866/482-7374 | guardian.com

HARDWARE

PanelGrip Dry System Base Shoe

Morse Industries

During GlassBuild America, Morse Industries will show its range of products including glass railing, shower hardware, J-channel, U-channel, slide track and angles. The company will promote its latest development in glass railing technology, the PanelGrip Dry System Base Shoe, which requires no special tools for installation. Morse's growing line also offers a complete variety of railing systems including glass panel, stainless steel handrail brackets, cable railing, stainless steel glass clamps, a rectangular line and fascia mount glass adaptors. Booth #2317.

INSULATING GLASS COMPONENTS

Fenzi North America

Fenzi North America added to its product line with the introduction of Fenzi Molver DM—a Desiccant Matrix for use on the Intercept Spacer System. Molver DM is a molecular sieve-based moisture adsorbent used in the insulating glass industry, and its adhesive properties have been adopted from the polymeric formulation of the high-performing Hotver 2000 sealant. Booth #1135.

Thermoseal Group Ltd.

The new Thermobar and Thermoflex high-performing warm edge spacers from Thermoseal are designed for dual pane or triple pane glass units. Thermobar, a spacer tube, is made with high-performance engineering plastic and a gas barrier tape system. It is supplied in black, grey and white with a wide range of bespoke color-matched components. Thermoflex warm edge spacer, the Group's newest product, is a pre-desiccated flexible foam spacer system with unique gas barrier tape.

J.E. Berkowitz

J.E. Berkowitz LP will exhibit its JEB 3Seal insulating glass spacer system, designed for the toughest commercial glazing demands. The spacer system is made from structural thermoset silicone with integral 3A desiccant and features a triple-seal design consisting of a pre-applied acrylic adhesive for spacer-to-glass bonding, a hot-applied captive polyisobutylene primary seal, and a two-part structural silicone secondary seal. With its no-metal design, JEB 3Seal has shock-absorbing properties that counteract glazing stresses and has minimal thermal conductivity. Booth #2723.
