

Fenzi Group Acquires Polish Sealants Company Kadmar

Glass Magazine

March 16, 2015

COMMERCIAL, FABRICATION

Fenzi Group acquired **Kadmar**, a chemical company in Jaworzno, Poland, specializing in the production of polysulphide, polyurethane, hot-melt and butyl sealants for insulating glass, as of March 1.

"The Kadmar manufacturing plant is very efficient, well-organized and productive, and its coatings are competitive," says Alessandro Fenzi, CEO of the Group. "From a chemical standpoint, the company's products are appealing. I see great potential for development within our Group and the Glass Alliance Network."

With a total of 10 manufacturing units globally, including two in Poland—Alupro Polska and Kadmar—the Glass Alliance Network, comprised of Fenzi, Alu-Pro and Rolltech, and engaged in worldwide sales of a vast range of high performance products for insulating glass, further strengthens its product range with a complete array of insulating glass sealants, Fenzi officials report.
